

LOFRA[®]
MADE IN ITALY

www.lofra.us

Made in Italy

Over 65 years of experience, passion and quality.

We love what we do. We love people enjoying the art of food.

We love to let ourselves be inspired by the needs of our customers, especially the most demanding ones, and to satisfy every desire as much as possible.

We aspire to perfection, because your kitchen is not just a simple room where you can prepare food, but a real kingdom where every sense is amplified.

Smells and tastes come together and give life to dishes that are unique, just like you.

Live your kitchen.

Live your Lofra.

Since 1956

BE PART OF LOFRA FAMILY

LOFRA is a brand for people that consider the kitchen the main place of their home.

Kitchen is where the family gathers to have a conversation about everyday life while having breakfast, lunch or dinner.

It's where our loved ones get together during the holidays and special events.

Cooking for family and friends is an expression of love and trying new recipes in the kitchen is an adventure.

Enjoy these amazing experiences with us and be part of our family.

Lofra's kitchen is much more than just a kitchen.

LOFRA[®]
 MADE IN ITALY

LOFRA HAS AN ITALIAN HEART

It all began with the passion and intuition of the Lovato brothers, who in 1956 started to manufacture pots, and led us to the creation of the CURVA line, our dual oven cooker's award winning design. Today Lofra continues to manufacture high end ranges and built-in luxury appliances to meet the needs of the most sophisticated customers.

We celebrate our 60th anniversary with the introduction of three new collections.

CURVA: a patented innovative and energetic design that represents the perfect union of tradition and modernity.

DOLCEVITA: a midcentury classic reinterpreted with all the elegance and functionality of modern technology.

MAESTRO: with its strong versatile design, this line is surprisingly elegant and extremely adaptable to different styles of furnishing and characterized by the highest technical performances.

DOLCEVITA LINE

The new Dolcevita is a tribute to 60 years of cookers production. A touch of tradition, supported by the latest technology.

Dolcevita is as beautiful as it is well built: knobs and handles are made from a single metal block, and the elegant clock allows you to program the cooking.

Dolcevita is our masterpiece: a real collector's item!

Dolcevita

The reinterpreted Dolcevita range is a **tribute** to more than **60 years** of cookers production and it's available in **contemporary colours** and **customized finishes**.

TRIM

Dolcevita ranges are made with extensive use of **stainless steel**: knobs and handles are cast from **solid blocks of metal** and available in a brushed brass, bronze or chrome finish.

DOLCEVITA 60" DUAL FUEL

IVORY
RIOD60MM-G800

*backsplash, hood and plinth are optional

Trim options:

DIMENSIONS:

Height: 35" 1/2 to 37" 1/4 (without backsplash and hood)

Width: 60"

Depth: 25" 1/2

Top

- Aisi 304 stainless steel top & back guard
- 8 brass burners and matte black burner caps (2 dual crown burners)
- Under knob One-Touch ignition
- Gas shutoff safety system
- Heavy duty cast iron grids
- Convertable to LP gas kit included

Main Oven

- Large multifunction convection oven: 9 cooking modes
- Full width Broil element
- Bake element
- True European convection
- 2 oven lights
- 3 panel, removable glass oven door
- Easy removable glass for cleaning
- Easy telescopic glide shelves
- 1 enamel oven drip tray
- Ventilated doors with Cooling System

Height adjustable stainless steel legs

Side Oven

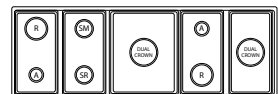

- Large multifunction convection oven: 9 cooking modes
- Full width Broil element
- Bake element
- True European convection
- 1 oven light
- 3 panel, removable glass oven door
- Easy removable glass for cleaning
- 1 heavy duty oven rack
- 1 enamel oven drip tray

Burner Type	Max. Input (Btu/h)
A	5,000
SR	8,000

MAIN FEATURES

REAL METAL KNOBS

Lofra's quality is visible in every little detail.

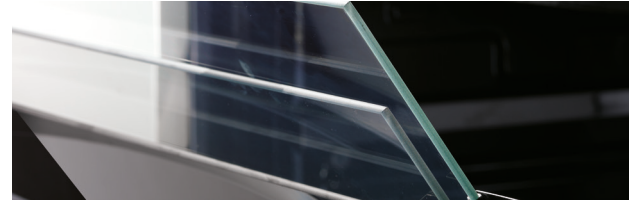

BRASS BURNERS

Aimed to provide efficiency and excellent cooking performances.

COOLING FAN

It prevents hot air from damaging the range controls. Cold air enters the oven door from below and warm air vents out through a slot above the handle.

TRIPLE TEMPERED GLAZED OVEN DOOR

Made up of three panels of glass, creating a semi-sealed chamber and a second chamber with an air current. It dramatically reduces the external surface temperature of the oven ensuring safety and reducing energy consumption.

TELESCOPIC SHELVES SUPPORTS

Special guides prevent the overturning of trays, grilles and spits with a load up to 33 pounds, while also permitting easy access for turning and basting.

GREASE FILTER

The grease filter ensures that the oven cavity is always clean.

ACCESSORIES

STEAK GRIDDLE PAN

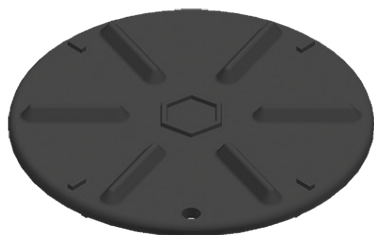

The wavy structure offers the possibility to roast any dish without worrying about excess fat, which flows easily at the bottom base of the plate.

WOK ADAPTER RING

Usable on all gas hobs, thanks to its cast iron structure, it is able to hold the Wok pot, allowing you to cook even recipes of oriental origin in the comfort of your own home.

To be superimposed on the Double Crown or Dual burner.

SIMMER PLATE

It creates a flat cooking surface, reduces and distributes heat evenly, eliminates hot spots in pans, and keeps foods from scorching.

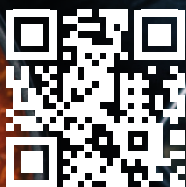

TEPPANYAKI FOR GAS BURNER

Made of stainless steel, allows you to grill directly in the kitchen. The front part acts as an oil collector to keep excess oil and fat away from food.
